TAServer[®]

"As a Service"

Installation

Date last updated: 2009-10-26

Attention: Please be advised that depending on your operating system and configuration the images displayed in this document may vary from your own.

Introduction

This document explains how to setup TAServer as a service on your network.

- A. Installing third party vendor software "Application as Service" from Eltima Software
- B. Setting up TA-Server as a service
- C. Turning TA-Server as a service OFF for performing TA Administration functions
- D. Turning TA-Server as a service back ON

A) Installing third party vendor software "Application as Service"

- Download the latest version of Application as Service at: http://www.eltima.com/download/application_service.exe
- Double click it using any file manager or Windows Explorer in order to start installation process

- Follow the prompts given, study the License Agreement carefully, select the destination path and choose shortcuts you wish to be created.
- Finish installation.

• Finally you will need to navigate either to the Start Menu and locate the launcher in Programs submenu or double-click the shortcut created on the desktop, if you chose this option, or simply launch Application as Service directly from the installer.

B) Setting up TA-Server as a service

1. Start up "TA-Server".

- a. Double-click the icon on your desktop or open it from "ProgramFiles\TeamAgendaServer\TeamAgendasServer.exe"
- b. Make sure that the correct *.tdb is selected; "Configuration\TeamName..."
- c. Make sure that all your licenses are entered; "Configuration\License"
- d. Make sure that you have the correct port number: "Configuration\Network Protocols..."
- e. Quit TA-Server
- 2. Start up "Application as a Service"

Double-click the icon on your desktop or open it from "ProgramFiles\Eltima Software\Application Service\Launch Application as Service 3.0.exe"

- 3. Setup "TA-Server" as a service.
 - a. From the "Main window" tool bar,

Click on the Create button to launch the "create service" dialog box.

b. From the "Create service" dialog box click on the *ki* browser to locate the TA-Server application. The default is "ProgramFiles\Teamsoft\TeamAgendaServer\TServer.exe".

Page 4 of 9

c. Using the "Open" dialog box:

Open						?
Look in:	🚞 TeamAgenda	Server509	~	00	10 🖽	•
My Recent Documents	TServer.exe					
Desktop						
My Documents						
My Computer						
	File name:	TServer.exe			~	Open
My Network	Files of type:	Executable file (*.exe)			~	Cancel

Select the "TA-Server" program.

Click the "Open" button to open the "TA-Server" program.

d. To create "TA-Server" as a service:

e. If you see 'TA-Server' in the "Services list" panel below, you have successfully created "TA-Server" as a service.

You need to configure 'TA-Server" to start automatically:

From the "Main Menu", double click to select "TA-Server" from the "Service List" screen below to edit the options for "TA-Service".
